Oct 3, 2018. In "Zombie Life" you can survive and hunt or be hunted. Walk the world as a zombie. Be a zombie, the infected, the human survivor, or the hunter who gets a little

The original Half-Life: Episode One is a first-person shooter video game that was released by Valve Corporation on November 11, 1998. The game was an official prequel to their previous game, the iconic first-person shooter, Half-Life. The game follows Gordon Freeman as he investigates the Citadel, an ancient research facility, whose history is dark and unpredictable. The game is set in the night before the events of Half-Life. In , the player controls the character Gordon Freeman as he investigates an unknown creature killing numerous civilians on board an underwater science station. It is revealed that the creature is actually a test subject that was genetically engineered to resemble a human; although this is eventually revealed to be the hoax of an insane scientist, the game opens with the events of Half-Life already occurring. Half-Life's inspiration, the Quake engine, the Half-Life 2 engine, the Source engine and the Zombie Engine are referred to collectively as "HL2". Half-Life had a very low budget compared to Valve's other major title, Half-Life 2. This was due to the development team being focused on a smaller project, Episode One, before the release of Half-Life 1. As a result, Half-Life was a more limited experience. This allowed Valve to focus on the game's technical and artistic quality, as opposed to working out gameplay mechanics. The game's focus on atmosphere, gameplay, and storytelling were notable changes from Half-Life's style, and these elements have had a lasting influence on other video games. Stuntman, the first video from the Stunts Dome, was only available as a free download for the first four weeks of the game's release. The video became one of the most requested things in the half-life.com message board. The player can choose from three different weapons to use: the assault rifle, the pistol and a crossbow. There is an inventory system. The player can buy and drop ammunition and other equipment from any weapon using the inventory system. There are different weapon types available, which grant different amounts of ammunition and health. They also have separate heat maps. The player is able to throw grenades with the crossbow, and strafe and run with the assault rifle or pistol. Half-Life's weapons were often seen in early games, the laser is perhaps the most notable. The game's early releases had players discover and fight through the game's four levels: the 'Combat', the 'Ambush', 'Citadel' f678ea9f9e
